

Hello, 2021115001.

## ✓ Multiplication Table

### Problem Description

Write a program which reads an integer (say N) and number of rows as input (say M), and prints multiplication table as output.

### Constraints

$1 \leq N \leq 1e3$   $1 \leq M \leq 1e3$

### Input format

Two integers N and M

### Output Format

Print all the M multiples of N on separate lines.

### Sample Case

#### Sample Input

3 5

#### Sample Output

```
3
6
9
12
15
```
