## **Answer - Coprime**

```
#include <stdio.h>
#include <stdlib.h>
#include <ctype.h>
#include <string.h>
#include <math.h>
#include <stdint.h>
int main()
{
       signed long int a,b,n,x=0,abs_a,abs_b;
       long int p;
       p=scanf("%ld %ld",&a,&b);
       if(p<0)
                      return 1;
       if(a<0)
                      abs_a=-a;
       else
                      abs_a=a;
       if(b<0)
               {
                      abs_b=-b;
       else
                      abs_b=b;
       if(abs_a==abs_b)
                      printf("NO");
                      return 0;
       if(abs_a>abs_b)
                      n=abs_b;
                      while(n>0)
                                     if(abs_b\%n==0)
                                                    if(abs_a\%n==0)
                                                                  X++;
