Answer - Economics students (a)

```
#include <stdio.h>
#include <stdlib.h>
#include <ctype.h>
#include <string.h>
#include <math.h>
int main(int argc, char *argv[])
       int n;
       int x,p;
        x=scanf("%d %d",&n,&p);
       if(x<0)
                       return 1;
       long int marks[n];
       for(int i=0;i< n;i++)
                       x=scanf("%ld",&marks[i]);
                       if(x<0)
                                       return 1;
                       if(marks[i]>100 || marks[i]<0)
                                       printf("INVALID INPUT");
return 0;
        double no=n;
        double pass=0;
       for(int i=0;i<n;i++)
                       if(marks[i]>=p)
                                       pass++;
        printf("%f",(pass*100)/no);
}
```
